CERTIFIED MAIL
RETURN RECEIPT REQUESTED

March 3, 1992

Mr. Steven D. Smith
Manager of Remedial Projects
Monsanto Chemical Company
800 North Lindbergh Boulevard
St. Louis, Missouri 63167

Dear Steve:

The Illinois Environmental Protection Agency is in receipt of your letter dated February 21, 1992. Pursuant to Section V.C of the Consent Order, your selections of contractor and sub-contractor for work to be performed under the Order are hereby approved.

As for your other requests, IEPA will not comment on utility installations or site improvements associated with installation of the trailers.

The pipeline from the pilot plant site to the Sauget P-Chem Plant and set up for the pilot plant equipment should have been included in your permit application to Division of Water Pollution Control. Approval of these proposals is anticipated if the permit is granted.

If you have any questions or concerns, please let me know.

Sincerely,

Paul E. Takacs, Project Manager
Federal Sites Management Unit
Remedial Project Management Section
Division of Land Pollution Control
